WQ4C.net – Phase I
Review 07/18/2021

Completed and updated in New Package:

1. Index.html and manualsearch – set focus to searchbox
2. Updated templates for "Empty Data" searches.
3. Cleared "no such table core_answerlist" error.
4. Fixed Modal for upload, formatting issue.
5. Corrected some template errors in templates files.
6. Turned off highlight for Manual Results, not needed on that section.
7. Customized names in Django admin backend.
8. Fixed date format in user profile, exam history, Upload/Download history page. 07/18/2021, not 18/07/2021.

ToDo List:

1. Check and fix some header count errors on searches matches.
   Test Words: ICOM, Kenwood, Apple, user, antenna
   Mostly saw errors when turning one option on and off on front search index page.
2. Pagination needs to be positioned correctly on bottom of page.
3. Need "Uploaded IP" function added to Ham Manual Files upload modal.
   Field has been added to model in models.py
4. Need "Failed Login", "Failed Login Date", "Lockouts" function added.
   After four failed logins, lockout account for 24 hours.
   After 4 lockouts,
   Lock account.
5. Manufacturer Model: only required field is manufacturer, other are option for admin update later.
   manufacturer = models.CharField(max_length=30, choices=MANUFACTURER, null=True)
   streetAddress = models.TextField(blank=True, null=True)
   city = models.CharField(max_length=255, blank=True, null=True)
   state = models.CharField(max_length=255, blank=True, null=True)
   zipCode = models.CharField(max_length=255, blank=True, null=True)
   emailcontact = models.EmailField(null=True)
   phonecontact = models.CharField(max_length=12,blank=True, null=True)
6. If JSON Exam practice question files are not used in Django functions anymore, remove.
   I noticed questions in database now.?

Critical Improvement
Limit user tries to login to 4 times, then lockout for 24 hours.
After 4 lockouts, send email to admin and lock account from logging in

POST FIXES:
Table issues with history pages for mobile view.
